"Every day is Earth Day when we choose to care, conserve, and create a better future."

Dear Parent,

At DPS Surajkund, Earth Day is not just a date on the calendar—it is a heartfelt celebration of life, nature, and our shared responsibility to protect the planet we call home. Each year, we come together as a school community to reflect, engage, and act for a greener, cleaner, and more sustainable future.

As a part of the celebration, we will be observing an Earth Hour on April 22, 2025 which is globally celebrated as Earth Day. This occasion offers a wonderful opportunity to instil in our children a deep respect for nature and an understanding of their role as future stewards of the Earth. As part of this meaningful celebration, we have planned a series of age-appropriate, hands-on activities that aim to nurture environmental consciousness in our students:

1. Campus Clean-up Drive – Under supervision, children will help tidy up the school campus and learn the importance of keeping their environment clean and green.

2. Earth Heroes Parade – We request you to dress your child in a costume representing any element of Earth such as water, air, plants, electricity, animals, etc.

Please also help your child prepare a one-line slogan to go along with their costume.

Example: "I am Water – Use me wisely!" or "I am Electricity – Turn me off when not in use!"

3. Earth Day Pledge – The children will come together to take a pledge, committing to simple actions that protect our Earth

Together, let's inspire our children to become caring, responsible towards the environment. We truly appreciate your support in making this celebration meaningful and impactful.

Warm regards,
Headmistress
